CAUTION TO THE PUBLIC.—The subscriber having completed a purchase of the exclusive right of the new and useful improvement in the Cooking Stove called the Improved Premium or Conical, takes this method to caution all persons from infringing upon his right. The stove to which he alludes is probably best known by the name of the CONICAL Stove, and has his name on the front. This stove was introduced into market in its present shape in the Spring of 1835, and about 1500 to 2000 sold. They have generally given great satisfaction, and the subscriber has made such arrangements as will enable him to supply the market the coming season. And as he has been informed that there are persons in the vicinity of Boston, who have already commenced manufacturing them, and others are preparing to make the said stove, he deems it his duty to inform such persons, and the public generally, that prompt measures will be taken to prosecute all such infringements. He also intends having an agency in Boston, where the public can be supplied with said Conical Stove on liberal terms, at wholesale and retail.

ORIGINAL POETRY.

TO THE EAST WIND.

My curse upon thy ruthless blast,
That Stygian sprites in anger cast,
On all that's fair:
Thy howling note brings nought but ill—
'Tis mis'ry's trumpet, loud and shrill—
Thy noxious air!

Harsh to my ears thy piercing rush;
My nerves recoil with trembling flush,
At thy dread sound;
While chilly horrors course my veins,
And agues prance, in choicest pains,
My body round.

E'en plants and beasts thy touch abhor;
Full well they know thy surly roar
Boles them no good;
Shrinking, they cower in affright,
And curse thy name both day and night,
In right good mood.

When stern nor-wester's manly blow
Sweeps o'er our hills and plain below—
Welcome! is he:
Though armed with winter's icy spray,
Blest health and strength still crown his day—
He's gen'rous, free!

But thee, fell pest! sad to behold—
Compound of shiver, sleet, and cold—
Auld Nick's grim breath!
All nature bids thee, with a frown,
Back to thy den go tumbling down—
Chief aid of Death!

Matrimonial accommodating arrangements.—A married couple in Paris who were impatient of waiting for the legitimate solution of the question of divorce, determined in 1834 to effect one for themselves, and drew up the articles of separation, which were acted upon. The husband, however, lately wishing to reinforce his conjugal rights, summoned the wife to return to him. This she refused to do, and at the same time appealed to the public officers, in whose hands the articles of separation had been deposited by her, demanding that they might be maintained. As these are curious, we are induced to transcribe them entire:—

"Between us, the undersigned, Eugene Anatole V———, living at Paris, on the one part, and dame Angelique Marie Antoinette R———, legitimate wife of V———, and living with him, on the other:—We do declare and agree that, having been married since the 30th July, 1832, our dispositions have never been able to sympathise together; and that, not being able to live in common agreement, we do reciprocally consent to quit each other, and to separate in good-will, and to live each by ourselves, freely and separately, where we shall deem good, and with whom we please, without either the one or the other having any thing to say about it but under the charges, clauses, and conditions following, that is to say—

1. That I, V———, give unto my wife all that composes our furniture; it being allowed me to withdraw only my clothes, body, and other linen, hats and shoes.

2. That if my said wife finds herself pregnant during the space of time that we have lived together, and if she be delivered during the space of nine months from this day, I promise, oblige, and engage myself to recognize the child she shall bring into the world; to pay the month's wages to the nurses, and to provide for all its wants.

3. That I oblige and engage myself in the same way never to trouble my wife under whatever circumstances she may find herself; and that she may live, go and come, as if we had not been married. I, Angelique Marie Antoinette R———, equally promised to let V———, my husband, named on the other side, live according to his pleasure, and be free as if we had never been married; and I engage to act with regard to him as he shall act towards me, as is said above and on the other side. In testimony of which we have signed and approve of the present document, after it has been read and agreed to at Paris, the fourth day of August, 1834; done in duplicate.

A Blacksmith's Wife become a Queen.—It is a curious circumstance, that the present queen of the Sandwich Islands, was formerly, or rather at this time, the wife of a Russian blacksmith. An English vessel lying off what we usually call the Fox island, several years ago, one of the officers became enamored of the fair spouse of a son of Vulcan there; and his passion being returned, contrived to smuggle her on board the vessel, and the captain, who, enraged at such a breach of faith and discipline, kept her confined till they arrived at the Sandwich Islands, where she was put on shore. The forlorn Ariaque, however, found a Bacchus for her Theseus, a royal lover in the place of her lost lieutenant. The King of the Islands became enamored of the fair Russian, made her his wife and raised her to his throne. He was no everyday King. He was a statesman and a hero, though we should call him a savage. He progressively created a navy of several well built frigates, taught his subjects to be excellent sailors, raised armies, subdued the surrounding islands, and at the close of a prosperous reign, left his possessions and his sovereignty to his Queen, who now reigns as his successor She is well obeyed by her subjects, possesses great wealth in flocks, herds, and rice grounds, and sends frequent presents to her former deserted husband, who continues to hammer horses' shoes in a Russian colony, while his faithless, but it seems not quite ungrateful spouse, stretches her sceptre over several prosperous Isles.

NEW ENGLAND CROWN GLASS.—The New England Crown Glass Company have recently erected a new furnace and are manufacturing an excellent article. Their Crown Glass is thick, pure and of excellent color. Its thickness gives it an advantage over all thin glass, which is liable to crack from contraction in cold weather. Its surface not being polished after being blown, retains its enamel, brilliancy and hardness, and is not liable to the objection which applies to Plate Glass, of being easily and permanently bedimmed by dust.

The New England Crown Glass being purer in color than *any other* Glass, is preferable for Stores, as it does not tinge the rays of light as they pass through it, and therefore white goods particularly appear to advantage; and it is peculiarly useful for Factories, as some minutes of light may be gained morning and evening, in consequence of the absence of color in this glass. The *price* of second quality is *reduced* from the rates heretofore asked.

☞ Those who wish to contract for this Glass are requested to specify NEW ENGLAND CROWN GLASS. As much imposition has been practised by dealers in Glass, by deceptive marks on boxes and other artifices, any purchaser who may apprehend he has been imposed upon is invited by letter or personally to apply to the subscriber for any information he may wish to enable him to detect the deception. Orders sent to the undersigned, at Boston or East Cambridge, or to any at the Company's Selling Agents, will be promptly attended to. Persons wishing the appointment of Selling Agent, can apply to the subscriber by letter or otherwise.

BOSTON MORNING POST.

TUESDAY, JUNE 28, 1836.

THE DEPOSITE BILL AND BANKS.

We copy from the Globe of Friday the two following important articles relative to the the Deposite Bill and the Deposite Banks:—

"*The deposite bill* has been approved by the President. The most important feature in this act is that which makes the several States the depositories of all the public monies which may be in the Treasury on the first of January next, over the sum of five millions of dollars, on their passing laws, pledging the faith of the States respectively to pay the warrants of the Treasury in the manner prescribed.—By an amendment introduced by an overwhelming majority of the House of Representatives, all the features of the bill which went to make the proposed transfer of the money to the States a loan or gift, were struck out, and as the act now stands, they are to be mere depositories, like the banks in which the public moneys are now kept.

We hazard nothing in saying, that had the bill passed as it went from the Senate, as anxious as the President was to see the public deposites regulated by law, and as painful as it would have been to separate on any subject from many of his most valued friends, it would have received his decisive veto. We have been surprised that any one who has read his annual message of 1829, and his veto messages on the Maysville road bill and Mr Clay's land bill, would for a moment anticipate any other result.

We are equally warranted in saying that the President has approved the amended bill, not because he thinks it judicious to make the States the depositories of the moneys of the United States, but because the plan is not obnoxious to constitutional objections; because it has been presented by a majority of the people's representatives, to whom the question of expediency on this subject peculiarly belongs; and because, by settling the question in relation to the public deposites, it disarms faction, and renders it more difficult for the money power to re-organize itself under the charter of a new national bank.

He thinks it impolitic and unsafe to mix up the affairs of the United States with those of the several States, and that the chances of perpetuity for our admirable system of Government are increased in proportion to the clearness with which the lines which separate their several powers, duties and interests, are defined and maintained. It is probable he will take some fitting occasion to make known to his countrymen, in detail, the views he entertains on this vital subject. It is only necessary now that they should know, that in approving the deposite bill he does not intend to countenance, in the least degree, the idea of raising money by the General Government for distribution among the States, thus lessening the responsibility of the State Governments in taxing the people, and at the same time encouraging extravagant expenditures; making the States, instead of independent sovereignties, the mere stipendiaries of the General Government; perverting the power of taxation given in the constitution to purposes never thought of by its framers; corrupting the sources of legislation; tending to consolidation; and ultimately destroying all that is pure and valuable in the structure and administration of our political system.

The President believes that it is bad policy, as well as unconstitutional, to raise money from the people for the purpose of distributing it among the States. He believes that when the revenues of the General Government shall produce more than enough to supply its legitimate wants, it is the duty of Congress forthwith to reduce the taxes upon the people. To collect for the purposes of distribution, is neither politic nor economical. It is not politic, because it necessarily increases the corps of public officers, and consequently the influence of the Government. It is not economical, because the people have to pay the salaries of those who manage the process and guaranty their integrity. Is it not better that the farmer's dollar should be left in his own pocket, than that it should be taken out by taxes, direct or indirect, and, after a year's detention, be handed back to him or to his State Legislature, with a deduction of twenty cents to pay collectors and clerks who have been employed to take it away and bring it back?—The same principles apply to all classes of society and to society itself, with the exception of those only who profit by high taxes.

Such, we are warranted in saying, are the views of the President in relation to this interesting subject."

Deposite Banks.—We consider it a fortunate circumstance for the administration, and especially the Treasury Department, that the recent bill, regulating the deposite banks, though very imperfect and objectionable in some of its features, and highly questionable in its policy in regard to its probable effects on the community at large, has become a law.

1. The wanton misrepresentations, assuming that the surplus money was hoarded or locked up from circulation, must now cease.

2. The opposition calumny, asserting that the surplus under the control of the administration was diverted into the channels of political corruption, will no longer have so much as "the baseless fabric of a vision" to rest on.

3. The stale slang, that the deposite banks are selected without legal authority; changeable for mere party purposes; dependent on the caprice or favor of the Executive, can no more be repeated at the corner of every stock-jobbing street, and from every Federal house top.

4. The enormous and alarming phantom of the dominion of the Chief Magistrate and the Secretary of the Treasury over the purse, at least, if not the sword—the horrible dangers to our liberties from the safe keeping and prompt disbursement of the public money, as Congress from time to time direct, have disappeared with the other *Gorgons, hydras, and chimeras dire*, of a profligate opposition.

5. The groundless charges, that political favorites of the administration were using the public money without performing adequate public services or paying any interest in return, and that the friends of General Jackson were fattening on the spoils, must now vanish.

6. The people—the real people—not combinations of speculating politicians and selfish corporations, will now see whether their substantial interests are made any more secure, and the great institutions and objects of the General Government any better promoted, and the harmonious action of the States will in any degree be strengthened or advanced, by the new, and we fear hazardous experiment, in our political system, which is attempted by the temporary disposal of the surplus.

We will assuredly hope the best results from it to the country as well as the administration, and will strive to promote them; but we dread the worst from the struggle which will be made to convert the deposite into a distribution bill. We will labor to defeat all innovation upon the present happy relation between the Federal and State Governments—to maintain the equilibrium founded on their concurrent taxing power, and independent Treasuries—and to suppress the introduction of any new principle which may tend to make the legislation of Congress a legislation for the States, as departments of a consolidated Government, instead of sovereignties competent to provide for their own wants, so far as concerns a provision for their internal interest.

A whig meeting at Charlestown, Va., recently passed the following resolutions:—

"*Resolved*, That we can beat Martin Van Buren.
"*Resolved*, That we will do it."

These laconic gentlemen are rather late in the day, and, withal, but servile imitators, for the great body of the people, had, long before,

"*Resolved*, That we can ELECT Martin Van Buren, and
"*Resolved*, That WE WILL DO IT."

These "Virginny chaps" only altered one word, and made fools of themselves, that's all.

The Musical Fund Hall at Pittsburg, Pa., has been fitted up for a Theatre.

No. LXXVIII. of Harpers' Family Library, contains Higgins's Treatise on the Physical Condition of the Earth, and its most remarkable phenomena; a work of great importance and usefulness. In the chapter on atmosphere, the following amusing facts are related:—In the Cathedral at Girgenti, in Sicily, there is an echo by which a sound is conveyed from the great western door to the cornice behind the altar. The confessional happened to be placed at the former, and some over-curious persons resorted to the altar for news, till by some mishap a listener once heard more than was convenient, by which the secret became known, and the confessional was consequently removed.—We are informed by Barthius, in his notes on Statius's "Thebias," that on the banks of Naha, between Coblentz and Bingen, an echo repeated the words of a man seventeen times; and although the repetition is, in most echoes, heard after the word or note of the person who speaks or sings, in this instance the repetitions follow the original sound so rapidly and clearly, with such varieties, that the voice seems to be lost in the multitude of mimicry.

"*Frank*," by Miss Edgeworth, from the same press, and too well known for its merits to require commendation, is for sale by Russell, Shattuck & Co.

Jordan has an excellent map of Texas for sale at his rooms, 121 Washington street, in pocket form. By this, speculators and heroes can select lands for raising cotton or burying their bones, while smoking cigars at their comfortable New England homes.

The Class Book of Nature, published by Belknap & Hamersley, Hartford, Ct., comprising lessons on the Universe, the Three Kingdoms of Nature, and the Structure of the Human Body, illustrated with engravings, is well calculated for the use of young scholars, and embraces knowledge which is generally but indifferently taught, if at all, in common schools. We hope to see it universally adopted by them.

Otis, Broaders & Co. have issued proposals to publish, under the title of "The New England Book," a work, which, they say, "for the beauty and elegance of its Typography and Embellishments, shall stand unrivalled. It will comprise the productions of the best living authors, native in New England, and of our most approved artists. Both the articles and the pictures will be chosen from among the highest efforts of their composers, and thus form an appropriate specimen of the existing talent of New England. No expense will be spared—no exertion withheld, in the attempt to exhibit a work, approaching as nearly as the state of the arts in the country will allow, to the finish and perfection of the fine editions of "Rogers's Italy" and the "Pilgrims of the Rhine." The work will be edited by PARK BENJAMIN, Esq., who, in the selection of every article and picture, will consult not only gentlemen distinguished for good taste, but each author and artist whose productions will illustrate the volume. The price to subscribers will be five dollars a copy, payable on the delivery of the volume."

Old News.—We have in our possession a paper printed here in 1789, in the French language, called "Courier de Boston," in which are several articles that will not be uninteresting at this moment—among them is the following account of a Fourth of July celebration:—

"Saturday last, 4th July, the anniversary of Independence was celebrated by the inhabitants of this metropolis with every mark of joy and felicity. Several companies of volunteer militia paraded under arms with all imaginable harmony and good feeling. They accompanied the principal officers of state to the church, where an excellent discourse was pronounced by the Rev. Dr. Stillman, whose name alone makes his eulogy. It was observed that on this occasion he lost nothing of that eloquence which has caused him to triumph in the pulpit, but that he gave to his political principles all the support which his religion accords to him. The ceremonies were terminated by an ode set to music and sung by Mr. Eaton. The Society of Cincinnatus held its annual meeting at the *Bunch of Grapes*. At noon it proceeded to the church, where a discourse was pronounced by Dr. Whitwell; after which the society returned to the tavern, where it passed the remainder of the day.

The different military companies also retired to their respective taverns where they passed the remainder of the day."

Mrs Hamblin's Theatre is very prosperous. Ingersoll is there. We were glad to see so full a house at the Tremont last night—it is impossible that our citizens are incapable of justly appreciating Mr DOWTON—his rare merits are too conspicuous for any one to deny them for a moment. We agree with the New York Times, that "Mr Dowton is precisely the actor we want most. Our 'American exuberances,' such as display themselves constantly in the performances of many of the best native actors, want curbing, and there is altogether in the manner of most of them just that extravagance and over-acting which the example of such an artist as Dowton is most calculated to remedy."

☞On Sunday, May 15th, the congregation of the Catholic Church (St. Mary's) in Charlestown were requested to remain in the church for a few minutes after the termination of the divine service, when a beautiful Baptismal Font, procured for the purpose in Naples, by Mr James N. Davies, was presented to the congregation. Whereupon it was unanimously voted, that the thanks of the congregation be given to Mr Davis for his splendid present; and that a copy of the Bible and of Butler's Lives of the Saints be also given to him as a lasting mark of their gratitude.

☞We received the Sunday Morning News yesterday per Steamboat, but found no *news* in it; it contains, however, a metamorphose of our friend Allen, the Stationer, into "*an actor and theatrical costumer*," which will amuse those who know him. The News thus confounds two very distinct individuals:—

"*Andrew J. Allen*, the well known actor and theatrical costumer, has lately shown us some specimens of portfolios, bound in an elegant style with gold and silver embossed leather. Mr. Allen, we understand, is the patentee of this leather, and will be happy to furnish customers with this most splendid article."

Yesterday morning, about 5 o'clock, as the Fitchburg and Keene stage, filled with passengers, was passing through Court street, the forward axletree broke, which upset the stage, and threw the driver, Mr Holman, so violently from his seat, as to brerk his shoulder. Some of the passengers were injured, but not seriously.—*Brigg's Bulletin.*

The Rifle Rangers, Capt Paine, will parade this morning, dine at Lowell, and return early enough in the afternoon to escort the New England Guards from the Worcester Depot, on their return from Hopkinton.

☞The folks all round say that they can't stand Mr Armstrong for Mayor another year, "no how." The license business—giving to one and denying another—the derangement in the school system, and the contract for the fence round the common, are raising a squall.

Twenty six States!—Uncle Sam has just doubled his capital in fifty years—pretty good business.

David Lee Child has returned from his Anti-Slavery Mission to England.

Congress.—In the Senate on Friday, June 24, a message was received from the President, accompanied by a communication from the Secretary of State, with copies of the papers and correspondence which have passed between the Executive Department of this Government, and the authorities of Texas.

On motion of Mr Clay, the report of the foreign committee on the recognition of the Independence of Texas, was postponed and made the order of the day for Wednesday next.

Mr Preston presented a memorial numerously signed by citizens of Louisiana, earnestly soliciting Congress to recognize the Independence of Texas, and enter into the usual commercial and civil relations with that country. Laid on the table and ordered to be printed.

In the House, Mr M'Kay moved to suspend the rules for the purpose of enabling him to offer Resolutions providing for the further reduction of the revenue, by an alteration of the tariff duties. The motion to suspend the rules was lost; the vote being, yeas, 124—nays, 66; not two thirds, as required.

Mr M'Kay gave notice that he would resume the motion on Monday.

There was no other business of importance transacted in either branch.

Interesting case of Doubtful Guilt.—At Hartford last week, a colored girl by the name of Ockrey was examined before the justices, on a charge of having caused the death of a little girl—daughter of a Mr Brooks, who was found drowned in a well. The Hartford Review informs us that it appeared from the testimony, that while the city was ransacked in search of the child, the prisoner, among others, was very much engaged in hunting for her, and continued her efforts till night. Something excited the suspicions of the parents a day or two after the deceased was found, and they caused the prisoner to be questioned touching her knowledge of the affair. Contrary to expectation, she confessed that the little girl was drowned through her instrumentality. She states that having heard there was a well situated in a dark, unfrequented part of the cellar, she went there between 9 and 10 o'clock on Wednesday morning to see it, that the child was then in her arms, and as she bent over the well to examine its depth and appearance, the child reached forward to seize hold of a lead pipe leading from the well to a sink above, and by accident slipped from her arms and fell into the well. Terror struck by this deplorable event, she says she dared not tell of it, but twice during the forenoon called the people to the spot with the intention of communicating the accident, when her courage gave way, and the child remained there till evening. The prisoner was ordered to bail in the sum of $2000, and for want thereof was fully committed for trial.—As murder is not a bailable offence, it follows that the justices did not think her guilty of that crime.—*Trans.*

☞We notice upon the Electoral ticket nominated by the Republicans of North Carolina, the name of Robert Love, who is said to have voted in the electoral colleges for Jefferson, Madison, Munroe and Jackson. The same is true of a gentleman upon the Republican ticket for Virginia. In this connection we may notice the names of Nath'l Macon, of North Carolina, and William R. Smith, of Alabama, who have consented to serve as Van Buren electors. These men, venerable for their age and virtues and the distinguished position they have so long maintained in the Democratic party, are pillars of strength not only at home but throughout the Union; while the fact that they must have obtained an intimate knowledge of Mr Van Buren from serving with him many years in the U. S. Senate, renders their support of him a rare and most honorable testimonial of his integrity, talents and Republican principles.—*Augusta Age.*

Another War Brewing.—The Far West published at Independence, Missouri, says information has been received from Kirkland, Ohio, through various channels, of another movement among the Mormons to obtain possession of the "promised land," and to establish their Zion in Jackson county, the scene of their former disastrous defeat. They are said to be arming to the number of 1500 to 2000 and to be making their way in detached parties to the 'debatable ground.' The Far West also states that the people of Jackson and their friends in the surrounding counties are taking effective measures for resistance.—*Louisville Adv.*

New Orleans, June 16.—General Houston and his staff have left for Texas, via Natchitoches.

As a proof that the affairs of Texas are restored to comparative tranquility, we have been informed by a letter dated Lynchburg, Texas, 21st of May, that lands which previously could scarcely realize $1 an acre, are now selling readily for $4 or $5. Speculation produced war, and will follow peace; but it is not yet safe to invest capital in Texas lands.

Creek War.—The Columbus Inquirer of the 16th inst gives an account of an action between 40 of the Guinnett cavalry and a body of 250 Indians, three miles above fort Jones. The action continued two hours, when a reinforcement of twenty men arrived from fort Jones, and it was continued half an hour longer. Twenty-five or thirty Indians are supposed to have been killed.—*Daily.*

Lynch Law Put Down in Bagdad.—A missionary with two camel-loads of tracts, reflecting upon Mahomet, went lately into the bazaar at Bagdad, and began to distribute them among the people. The consequence was a general cry to Lynch all the Christians in the place.—The Pacha, by threats and determined conduct, succeeded at last in quieting the mob, and three thousand troops were ordered from Constantinople to help "the regular police."

Mr Bristow has been in this city for more than a week, and if he has not taught at least five hundred people to write better than they did before, the fault is their own and not his. He has skill enough, and those who wish to write well have no excuse, if they do not obtain his assistance in teaching them.—*Boston Courier.*

Fatal Accident.—A young man at Queeche village, in Hartford, Ct., named Cyrus Snow, Jr., while engaged in painting the factory building, fell from the side of the building overlooking the river, where it is six stories in height, in consequence of the insufficiency of the staging, upon a rock, and thence into the water. He died in three hours after the accident.

The Richmond Co. (Va.) Compiler, complains bitterly of the impure water of the hydrants of that city, rendered more turbid by the late heavy rains and a copious infusion of extraneous matters, comprising such delicacies as "tad-poles, hairy insects, and infant sea-serpents." He calls loudly for a new public filter.

☞The paragraph going the rounds from the Salem Gazette, stating that the commission has agreed to report in favor of codifying the "*criminal law*," is incorrect. The commission has decided that "it is expedient and practicable to codify the Common Law."—*Gloucester Democrat.*

On Friday last, a gentleman of the name of Daggert, having had a quarrel with another individual, in the upper part of this State, whose name we could not ascertain, the latter plunged a knife, which he drew from his bosom, into the heart of the former.—*New Orleans Advertiser.*

We learn from the New Orleans True American of the 10th inst. that Hubbard, the person who set fire to the U. S. Treasury Department at Washington city, was arrested in that city on the previous day.

A man in Lancaster, Ohio, named Work, recently choked a boy to death, and secretly buried him, because he was a principal witness on a charge against Work for stealing.

Aaron Tufts, a laboring man at Nashua, N. H., was found dead in a pit in a soap manufactory, having been seen in the vicinity, the preceding evening, in a state of intoxication.

POLICE COURT.

A feeble and timid old dame, answering to the call of *Elizabeth Edgerton*, and attired in a clean pink gown, merino shawl, and cotton turban, was very much perplexed by the technical terms of the complaint against her, setting how that she did libate beyond the legal quantity. "I don't exactly know what to say, for I do drink sometimes," she replied, with amusing simplicity.

1st Officer—Are you a common drunkard—Yes or No?

Elizabeth—What is a common drunkard?

1st Officer looked thoughtful, and tacitly confessed himself dumb-foundered, and mizzled off.

2d Officer—If you don't know whether you are guilty or not, say "Not guilty," and let the Court find out.

Eliz.—Then I should tell a story in some degree.

Clerk—She does not exactly mean to say that she is guilty, and I'll enter a plea of "not guilty."

Eliz.—But I *spose* I am guilty in some *measure*.

Elizabeth was exactly right—she was "guilty in *some measure*"—to wit, to the measure of three pints gin a day for a fortnight. It was also proved, that she had sold three sheets, an apron, and a towel, for one day's drink. She begged hard to be only fined, and pledged her word that she "would leave these parts," adding—"The cause of my drinking is this—the other day they brought home a young man, who had fallen down, and was attended by *two* doctors. The moment I saw *two* doctors, I supposed he wouldn't be likely to live long, and so he died the next day, just as I expected, and it set me in such a worriment, that my sister gave me some gin to quiet my nerves, and that set me fairly a going, and I kept a going it ever since; but I think if I could go into some *good* county where they don't sell gin, I should soon get over it."—Sent to the Country House of Correction for six months.

One of the most inoffensive looking objects that are periodically brought up for habitual intemperance and dangerous and disorderly conduct, is poor *Peter Grugin*.—On Sunday afternoon, veteran Reid was called upon to arrest him, for turning his wife out of *doors*, and kicking up a general drunken row. "This all comes of your drinking *rum*," said Reid. "It's a lie," said Peter, "I havn't drank a spoonful of *rum* since I came out of the House of Correction." "Don't tell me such a story as that, Peter," continued Reid, "What have you got in this 'ere tin pot?" "Not rum, anny how," replied Peter. Reid was incredulous, and, digging his long, boney fingers into the liquid, drew it across his nasal promontory, and exclaimed, "By-hokey, it's *brandy!*"

The second witness said Peter abused his wife shamefully, but he assured his honor that it was "all a mistake, for he never spoke an angry word to his wife in her life, only yesterday she wanted to carry her child to be christened at the church in Pond street, and he wouldn't let them go."

Magis.—How does he *treat* his family generally?

Witness—He don't *treat* them at all—he never gets them any money, or food, or any thing else, at all.

His honor held that Peter's not *treating* his family at all was tantamount to "evil entreating" them, as the complaint alleged.—Four months in the House of Correction.

John Ferguson was also up for kicking his wife out of doors. He denied the "*soft* impeachment," and remarked—"I *can* take my oath, that I never struck my wife in my life, and I have been married these seven years." To this Mr Witness replied, "Ferguson always keeps himself in such a quandary with liquor, that it is'nt likely he knows what he does one half of the time." "That's true, your honor," added John—"I own that when I drink a little, I'm rather foolish." Proof in point—John *foolishly* hooked 9 dollars that his wife had saved out of her own earnings to pay the rent.—6 months.

Sudden Death.—Mr Thomas M. Thompson, a Hardware merchant, and one of our most estimable citizens, fell in an apopletic fit, last evening about nine o'clock, while standing at a box door in the Tremont Theatre, and expired immediately.

We notice, says the N. Y. Post, among the convicts put on board the hulks at Woolwich, one who was sentenced to be transported for life for having stolen a pocket handkerchief. This is almost as bad as our combination law.

The author of "Truth" challenged the author of "Pencillings by the Way," on Saturday, which the latter declined noticing.

Accident.—The Gazette burst its breeches yesterday in trying to straddle the Deposite Bill.

The Courier has fastened the Old South Steeple, put Bayley's store all right, and made the building at the corner of Devonshire street as strong as the Moro Castle. Who 'll deny the power of the PRESS after this?

The Umbrella Division of the Massachusetts Militia, which has been constantly under arms for the past fortnight, will parade this morning upon the Common, and after inspection be dismissed for a month.

MEDICAL CARD.

"Medicamentorum varietas ignorantiæ filia est."—BACON.

"Take these plants and those flowers, they are specifics for thy father."

DOCTOR WILSON, Licentiate of the King's and Queen's Colleges of Physicians, Dublin, Ireland, is taking a tour through America, and seeing in every place he arrives at, numerous invalids suffering under various diseases, and so many who have ruined their constitutions by using advertised mercurial nostrums; respectfully informs the citizens of Boston, that he intends remaining in this city three months, for the purpose of rendering his professional aid to the afflicted. Dr W. having pursued his studies in the University and hospitals of Dublin, with confidence offers the public his professional services; the advantages he has possessed of acquiring a knowledge of diseases in general, have been very great, and his time is much devoted to the study and cure of chronic diseases;—and since his arrival in this happy land, he has restored numerous invalids to health; and gratitude arising from the altar of their hearts, is a delightful enjoyment, which far outweighs every other consideration. We overlook and neglect, as beneath our notice, the rich and bounteous stores of medicines, which the Almighty has caused to spring out of the earth in every clime, and sufficient to cure every disease; and yet we are ignorant of their virtues, and there suffered to "waste their healing on the desert air"—although every plant and flower, from the cedar of Lebanon down to the lily of the valley, has medical virtues, and active principles, which readily assimilate, and are more congenial to the nature of animal fluids, and better adapted to purify those in a morbid state, than mercurial nostrums. Ten years' experience authorizes Dr W to declare, that every disease will admit of relief, or may be cured, by the administration of vegetable remedies; and the doctor asserts with confidence, that the numerous cures he has performed, are entirely to be attributed to the great deviation in the treatment of those diseases, which he found necessary to adopt, from the usual mode of practice, differing so materially from the course of medicines generally prescribed in similar cases. This astonishing difference in success, is a fair exemplification of the infinite superiority of the simple and safe means of cure which the God of nature has created for the benefit of the human family, over those which the science of man has invented. The effects of vegetable medicines upon the system are temporary, exerting their efficacy and passing off, eradicating the disease, and restoring the constitution; but the effects of mercurial nostrums are lasting, decomposing the solids, and undermining the constitution by a slow and sure destruction.

☞Dr W's professional conduct is guarded by the strictest principles of honor, and all communications are strictly confidential, and no case is undertaken unless he is confident of effecting a cure. Dr W.'s medicines are selections of mild and safe ingredients, the produce of the vegetable kingdom.

Dr W may be consulted on all diseases at his apartments, No. 18 MILK STREET, (next door to the Old South Church,) from 8 o'clock, A. M. to 7 P. M. All persons in need of Dr W.'s aid are requested to apply immediately.

All the said chain cable Iron must be of American manufacture, *without* any admixture of foreign iron—must be manufactured from *hammered bar iron* of the best quality, to be made from *blooms*—the links must be *cut, piled* and *rolled* to about two inches in diameter—they must be again *cut, piled* and *rolled* to the respective sizes and lengths specified and prescribed for the links and end links. Satisfactory proof that the iron is of the quality, and has been manufactured in the manner prescribed, must be furnished by the contractor with the deliveries to be made, otherwise the Commandant of the navy yard will not authorise the iron to be admitted to proof and test.

The iron required for the Shackles, Swivels, Boxes, and the oval Pin Iron, must be wrought *under the hammer* to the respective sizes prescribed for the same, and to such shapes or models and drawings thereof as shall be furnished to the contractor by the Commissioners of the Navy, or by their authority—and no portion of the said Chain Cable Iron shall be received that does not conform, in all respects, to the provisions and stipulations of the contract to be made, and that is not free from flaws, raw and fagged ends and edges, and all other defects which may impair its good quality, fitness and adaptation to the purposes for which it is required. The pieces must be delivered in straight lengths. On delivery, the said iron will be inspected, proved and tested, to determine its quality, according to contract, and that it corresponds in all respects to the aforesaid provisions and stipulations, to the satisfaction and acceptance of the Commandant of the said navy yard.

One fourth of the entire quantity of each of the sizes and denominations of the said chain cable iron must be delivered on or before the first of October, 1836; in like manner, one fourth must be delivered on or before the 31st of December, 1836, and the residue must be delivered on or before the first of April, 1837; beyond which no extension of time will be granted for completing the deliveries; but the contractor will be allowed the privelige of delivering the whole and entire quantity as much *earlier* as may be convenient and practicable, at his option.

Ten per centum will be withheld from the amount of all payments on account of the contract to be made as collateral security, in addition to the bond, in the amount of one third of the contract, which will be required to secure its performance; and will not in any event be paid until the contract shall be complied with in all respects. 3taw P&S june 16

NAVY AGENT'S OFFICE.
Boston, June 14, 1836.

PROPOSALS will be received at this office, until the 5th of July next, at 12 o'clock, noon, for furnishing and delivering at the Navy Yard, in Charlestown, Mass. the following materials required for building Hemp and Tarring Houses, in the aforesaid Navy Yard, viz:—

About 750 cubic yards of stone in blocks suitable for a cellar wall, to be laid in regular courses and to be 2 feet 6 inches thick, with one good face.

26,000 feet stone, got out to dimensions, agreeably to a plan which will be furnished; one fifth part are to be headers or binders not less than 16 inches in the wall, and to be equal to a sample, marked "sample," and now laying nigh the stone shed in the Navy Yard aforesaid, and in all other respects to conform to the Rope Walk which has lately been erected in said Navy Yard.

3 000 to 4,000 feet of hammered or dressed stone.

500 running feet of capping or cornice, 2 feet 6 inches wide and 10 inches thick.

950 superficial feet of quoins, the whole to be hammered equal to a sample, as mentioned above.

410 running feet of cornice furnished in the rough, 3 feet wide and one foot thick, in pieces not less than 5 feet in length.

750 000 good hard bricks. Each person offering bids, will furnish a sample of half a dozen of bricks, showing the size and quality which he intends to furnish.

Such parts of the dressed or hammered stone as show are to be measured.

The rough ashler to be not less than 8 inches thick, to have the beds and builders hammered square to the face, not less than 6 inches from said face, so as to make a good joint at that distance from the face of the wall.

The headers or binders, marked with the letter H on the plans, are not to be less than 16 inches in the wall, and the bed of said binder to be measured—all other ashler to be measured on the face and revels of the windows and doors.

All the above mentioned materials to be delivered from time to time as wanted, at such places in the aforesaid Navy Yard, as may be hereafter directed, so that the whole of said materials shall be delivered by the first day of July, 1837, subject to such inspection as the Commandant of said Yard shall appoint.

N. B. The Cellar Stone is to be delivered at the aforesaid Navy Yard in the course of the present season, so that the whole may be delivered by the first day of October next.

☞For all further information, inquire at the Commandant's Office, at the Navy Yard, Charlestown, Mass.

NAVY AGENT'S OFFICE,
Boston June 15, 1836.

PROPOSALS will be received at this office until the 5th day of July next, at 12 o'clock, noon, for furnishing and delivering at the wharf of the Magazine, Chelsea,

About 175 cubic yards of foundation stone—also about 250 cubic yards of stone, for wall 12 feet high, 1 foot 6 inches at bottom and 1 foot thick at top, the thickness to be in one stone in courses from 1 foot 3 to 1 foot 6 inches in height, the bed and builds dressed so as to make fair joints. Also, about 430 running feet of capping, 1 foot 6 inches wide, 7 inches thick, the whole to be in materials and workmanship equal to the wall at the westerly part of the Navy Yard, Charlestown.

The delivery of the foundation stone to commence immediately after the contract is signed, the other stone as soon after as is practicable, so that the whole is completed by the 1st day of October next

[illegible]50 cubic yards of stone for a foundation of wall, to be 5 feet thick 500 cubic yards of stone in block, to make courses from 18 to 24 inches rising suitable for a bank wall 5 feet at bottom and 3 feet thick at top, to be delivered at the wharf of the Navy Hospital, Chelsea, on or before the 1st day of August next.

Also, 170 cubic yards of stone in blocks to make courses of 18 to 24 inches rising to be two feet at bottom with a gradual slope so as to be 1 foot 6 inches at top, the height of said wall to be from 12 to 14 feet—the stone are to be dressed bed and builds so as to make good joints.

Also, about 190 running feet of capping 2 feet wide, 1 foot thick in the centre, 9 inches at the edges. The whole to be done in every respect fully equal to the wall erected a few years ago at the west part of the Navy Yard near ship house No 1—the delivery to commence as soon as convenient and the whole to be delivered at any landing of said Navy Yard by the 1st day of September next.

PROPOSALS will likewise be received at the same time and place for building a pier or pile wharf about 130 feet by 25 feet wide, from the stone wharf of the Magazine to the channel of the creek—said wharf to be built in the following manner, viz:—to have good oak piles not less than 12 inches square at the butt, nor less than 10 inches at the top of said piles, well driven into the earth, not to be more than 8 feet apart from their centres, to be well braced and tied with oak ties and braces, and bolted. Against each outer pile a spurshore is to be driven well into the earth and bolted—the piles to be capped in the usual manner, with good pine timber, not less than 1 foot square—the whole to be covered with 3 inch plank, well secured by treenails.

The whole to be done before the first of November next, in a good substantial manner, of good materials and workmanship, to the entire satisfaction of the Commandant of the Navy Yard, Charlestown, Mass. and subject to such inspection as he may appoint.

HIGHLY ELIGIBLE MANUFACTURING LOCATION.—The Managers of the Trenton Delaware Falls Company have the pleasure to announce to the manufacturers of the United States, that their works are now on the eve of completion, and that they are ready to furnish water power for propelling any kind of machinery.

Although the water has but recently been introduced into the race-way, seven mills of different kinds are now in operation upon it.

The Company derive their supply of water from the river Delaware, taking it therefrom by means of a canal or main race way, about five miles above the city of Trenton, and conduct it thus along the river to the village of Lamberton, three-fourths of a mile below the city, and upon the navigable tide water of the river.

The race way is 60 feet wide at the top water line, 6 feet deep, and at the lowest stage of the river known, supplies a column of water equal to 23,868 cubic feet per minute. The fall at the Assanpink is 14 feet, and at the company's sites is 18¼ feet. This volume of water may be doubled when desired.

The charge for the water is $3 per square inch per annum, above the Assanpink, where the head and fall is 14 feet, and $4 below the Asanpink, where the head and fall is 18¼ feet at medium tides. The above prices are upon the hypothesis that the water is drawn under a three feet head—if drawn under a less head the price is proportionably less, according to the tables of calculation in the office of the company.

A number of valuable mill sites, along the line of the race way, owned by individuals, are now in the market. In addition to these, the company possess about 20 most eligible situations. These, it is their determination to dispose of, by sale or rent, on the most favorable terms, having procured them with that view. They have also about 200 building lots, which they design for the accommodation of the mills, on terms equally advantageous with those for the mill sites.

In addition to the above, the company contemplate in a short time, to build the shells of mills, upon favorable terms, to be agreed on, on plans to be presented to them, and these to rent with the water to manufacturers who will fill them with machinery.

They are now ready to receive proposals for leasing or selling sites—letting water—and erecting mills as above—and they invite the attention of the manufacturing community to their work.

The location of no manufacturing place could be more advantageous. In facilities of every description, Trenton far exceeds most manufacturing towns in the country. Situated between New York and Philadelphia, with a direct water communication with both cities—within two hours ride, by the Pennsylvania Railroad, of Philadelphia; and within four hours ride of New York, by the Straight Railroad, about to be constructed—lying on a noble river, navigable almost to the very doors of the mills, and penetrating a vast lumber and rich mineral and agricultural country for 150 miles above Trenton; the location is supplied on every hand with the most available means of communicating with a choice of markets, and of a certain and cheap conveyance of the raw materials to the mills. If cotton mills are established, the bales of cotton can be shipped at New Orleans and unladen at the company's wharves, without any intermediate labor or expense. If iron foundries are erected, an abundance of ore and coal may be had via the river Delaware and the Morris Canal from the Sussex and Morris iron, and Pensylvania coal mines. If merchant mills are put up, they will have the whole grain region of the valley of the Delaware to supply them. If saw mills, the hundreds of rafts of logs which every spring and fall descend the river, would be at their command. Indeed, as an abundant supply of the raw material, and a ready access to the best markets, are the great desiderata of all the various branches of manufactures, there is not one of them which could find a more eligible location in the Union than exists here.

Communications addressed to the subscriber will receive immediate attention.

PHILEMON DICKINSON, President.

Trenton, N. J. June 14, 1836.

N B A map exhibiting the location of the above work, with the contiguous public thoroughfares of land and water, may be seen at the City Hall, Boston. isM&T2m je21

PAINTED ON 2000 FEET OF CANVASS!

IS NOW OPEN.

THIS splendid painting is from one of the many sketches of the illustrations of Scripture History designed by the late B. WEST, Esq., for a Gallery intended to have been formed by his late majesty, George III., and has been exhibited in London for 5 months to upwards of 80,000 visiters. The effect of it is truly impressive and powerful—it is a scene of awful sublimity and grandeur and shows the truth of the denunciations in the Bible against Jerusalem. As a work of art it must inspire every one with admiration at the prodigious efforts of human genius, and the gigantic ideas of the artist, and such is the extraordinary illusions with which it is painted, that the mind is led to contemplate it as a subject in reality.

Open from 9 till dusk. Admittance 25 cents.

TO PERSONS SUFFERING FROM RHEUMATIC COMPLAINTS.

To the Editor of the Inquirer :

SIR—On the principles inculcated by the great and good Dr Franklin, to diffuse as widely as possible every means in our power to mitigate or soften the afflictions of suffering humanity, I feel it incumbent upon me to make known through the medium of your useful paper that on reading therein an advertisement of Dr Jebb's Liniment, for the cure of RHEUMATISM, I was forcibly impressed with a belief that it was calculated to remove the severe Rheumatic Affection to which I had been for seven or eight years subjected, sometimes almost depriving me of the use of my limbs. I accordingly procured a Bottle, and before I had used the whole of it, found very sensible relief. This increased my confidence in it, and led me to obtain another bottle, the use of which has completely removed the swellings and pains of my limbs, together with the cramp, and restored them to their wonted vigor.

I am respectfully yours,
GEORGE TAYLOR, JR.

Hempstead, L. I., March 24th.

Persons suffering from the above complaints, and in despair of a cure from the failure of the various remedies they have used, are invited to make trial of this long and celebrated medicine, which has in years passed cured and relieved, as it is now doing, thousands who had despaired of relief. Nothing but a fair trial can give an adequate idea of its unrivalled excellence. It is also one of the best applications known for stiffness of the joints, numbness, spains and chilblains.

Antibilious Pills !

For Indigestion, Loss of Appetite, Listlessness, Headache, Costiveness, Flatulence, Cholic, Bilious Affections, &c.

TO comment on the efficacy of these Pills, after a successful experience of many years in England and America has established their reputation, is needless—suffice it to observe, that for redundancy of Bile, Flatulence, Costiveness, Headache, &c. they will undoubtedly prove far more serviceable than those drastic purges too frequently employed, and will not only at the same time tend to remove the offending cause by gentle motions, and strengthen the digestive organs, but improve the appetite and renovate the system. Price 50 cents.

BURNS AND SCALDS.

A POSITIVE CURE.

ANTI-PHLOGISTIC PASTE, for Burns and Scalds, Erysipelas and Phlegmonous Inflammation, St Anthony's Fire, Erythema, Shingles, Stings and bites of Insects, Inflamed Blisters, Vegetable Poisons, Chapped Hands, &c.—Fever Sores, (Necrosis) Biles, Inflamed Breasts, Whitlow, Abscesses, Carbuncles, Gangrene, &c.; Sore Legs, Ulcers of every description, Schirrous Tumors and Glands, Bruises and Sprains Fractures, Contused and Lacerated Wounds—every grade of Gunshot Wounds. It is sure to give immediate relief, and a healthy action to the living parts, and we can hardly conceive of a fracture or wound so bad as to cause death, or need amputation, if the Paste be timely and properly applied. All inflammations of a specific character, as Scrofulous Tumors, Glands Ulcers, and Abscesses—White Swellings, and Inflamed Joints from any cause.

Scrofulous Humors, and every other species of Eruptions, as Salt Rheum, Herpes, Scalded head, Ringworm, Pimpled Face and Blotches. It is a specific for the Piles, giving immediate relief. Local Syphilitic Inflammation it is sure to remove, and prevent suppuration in the worst cases.

In all the above diseases the Paste has but one action, which is the removal of heat, pain, swelling, and more or less of fever—when this is done, nature soon finishes the cure, or the diseased parts become well simultaneously. It needs no certificates—use it, and you will know more of it than can be told you.

BRITISH COLLEGE OF PHYSICIANS AND SURGEONS, LONDON.

IT has become a duty to acquaint the public that the genuine Improved Hygeian Vegetable Pills which are prescribed in accordance with the doctrines of the British College of Physicians and Surgeons, London, and which are recommended by the writings and practice of Sir Astley Cooper, Mr Abernethy, and the most eminent Physicians and Practitioners of Europe and America, are signed on the outer cover of every package, in the following lawful and particular manner:

JOSEPH RALPH, M. D.—GRADUATE OF THE UNIVERSITY OF EDINBURGH;—MEMBER OF THE ROYAL COLLEGE OF SURGEONS, LONDON;—LECTURER ON MIDWIFRY AND THE DISEASES OF WOMEN AND CHILDREN;—AND AUTHOR OF THE "FAMILY PHYSICIAN, A DOMESTIC GUIDE TO MEDICINE."

(Note. The various documentt, Diplomas and stamped Certificates, which show the connection of the Author with the Institutionsabove mentioned are publicly exhibited at the General Office, Cortland street, N. Y. and may be seen by ank individual at any time.)

Nothing seems to have afforded more general satisfaction and advantage to society, than having the Hygeian Medicine prescribed and prepared by a regular and practical physician, and one who may at all times be consulted or appealed to, either by post or otherwise, on the subject of its operation and disease. This also is the more appreciated in consequence of the number of different medicines which are daily advertised under various pretences in the name of "Hygeian" and "original Hygeian."

The directions which accompany every package of this Domestic Medicine, are exceedingly plain and particular,—the proper dose and management of the Pills being carefully given under the head of each disorder separately. Those who keep this medicine by them, especially country families, find that nothing is more economical or better adapted for family use, and being free from mercury or any hurtful property, they may always be resorted to with perfect safety. Neither is it too much to state with strict regard to truth, that thousands are indebted to this medicine for the preservation of life and ealth.h

The connection which exists between the organs of digestion and almost all deseases, being the basis of this Domestic Medicine, there is scarcely a disorder incident to human nature in which they are not taken advantageously, but those disorders in which the most remarkable instances of benefit and cures have been experienced are the following:—Bilious disorders, Dyspepsia, affections of the head and nervous complaints, with all those various disorders which originate in hot climates or from costive bowels. Also, Fevers, Inflammation, Gout, Rheumatism, Cutaneous Diseases, Jaundice, Liver Complaint, Scrophula, Coughs which threaten Consumption, and especially Gravel, Gleet, and other weaknesses in the Urinary and Geintal organs.

This Medicine also, in a peculiar manner, is adapted to the disorders of the female constitution, both in early and more advanced periods of life.

LIGHTNING CONDUCTORS.

DR KING, continues to prepare and affix to buildings his improved lightning conductors—they are approved of by all practical Electricians as affording superior protection against lightning to the old round form. Numbers of scientific gentlemen in Boston and its vicinity, have had them affixed by him to their Mansions and other buildings, among them he will name those of President Quincy, Professor Webster and Popkin of Harvard University, Governor Lincoln of Worcester. They were likewise highly recommended by Professor Silliman in his much esteemed lectures on Chemistry lately delivered in Boston. Gentlemen intending to have conductors, are invited to his room No 54 Cornhill, Boston, where they may see the superior effect of his rods illustrated. He continues to manufacture, and has on hand large plate Electrical machines of superior powers, also Cylinders—Large and small Galvanic batteries, Electro Magnets and their apparatus—warranted of the best workmanship. He lately constructed for Professor Silliman the largest Galvanic Deflagator ever made. Gentlemen arriving in Boston to purchase such articles, would do well to call before they buy. His prices will be accomodating for cash or approved credit.

EXPERIENCE *versus* THEORY.

DR. W. EVANS' CAMOMILE PILLS, having long acquired an exalted reputation in private practice by an invarible efficacy which could only have resulted from their exalted worth, he is confident that he has only to get them extensively known to render that reputation universal. Unlike the clamorous host of quack medicines with which the columns of the public press are crowded, these Camomile Pills, have the testimony of the whole medical profession in their favor, and not a single case of ill consequences or inefficacy to be alledged against them. Their very name candidly acknowledges what they are composed of—and they honestly promise no more than they faithfully perform. They are composed of a beautiful extract of the Camomile flowers, in which all the tonic and restorative principles of that inestimable plant is preserved; and its irritating principle is neutralised by an alkeline infusion—they, therefore, necessarily afford immediate relief, in all cases of dyspepsia, or other derangements of the digestive organs. In sick headaches, nervous debility spasmodic affections, prostration of muscular and vital energy, and consequent loss of ease, comfort, and ultimately of life itself they restore health in the most impaired and hopeless constitutions, not by being taken in excessive quantities, for the necessity of their use continually decreases, as of course it ought to do, if they are good for anything—by their direct adaptation to the powers of the human stomach. There is one disease, however, which is unhappily but too prevalent, in which their ability will perhaps become pre-eminent, and that is in the disease which is produced by violent drastic purges, taken in pernicious quantities, and which may be termed the "Quack Mortem" disease. The excessive debility, both of body and mind, produced by this destructive practice, can only be relieved by a tonic, and such as the Camomile preparation contains. Dr W. Evans supplies an antidote for a host of public poisons, and a remedy for all those diseases which he professes to cure. A single trial will prove the vast superiority of a course of practice which is based upon science, experience, common sense and honesty.

TO THE LADIES.—Amongst thousands of ladies benefitted by Dr W Evans' Camomile Pills, Mrs M. Beaumont (corner of Canal and Washington streets) has kindly allowed it to be made known for the benefit of others, that she was brought (by mental affliction) to a very weak and bad state of health, with pains in the side and head, was recommended to take Dr. W. Evans' Camomile Pills, which she has done to her comfort of mind and restoration of health. MRS. M. BEAUMONT.

TO THE AFFLICTED.—For the benefit of the public, and in gratitude to Dr W. Evans, I consider it a duty I owe, to make known the great good I have derived from EVANS' CAMOMILE PILLS. Having been five years afflicted with dyspepsia of the worst kind, I made application to numerous sources without benefit, but by the use of three bottles of Evans' Camomile Pills, and three boxes of Evans's Aperient Pills, I have found signal relief, fully to my satisfaction, and I am more healthy than I have been for many years. The symptoms (which were pains in the chest, weaknesses in the whole frame, heart-burn, flatulency, acidity, and headache) are all removed. I deliver this testimony over to Dr Evans, for his and the public benefit, for it to be made known. I hereby sign my name and address.

EDWARD RHODES, 95 Crosby street, N. Y.

A great many persons have been benefitted and cured of different complaints: such as Dyspepsia, Consumption, Billious and Liver complaints, Headache, Weakness, Female Complaints, Nervous Diseases, Spasms, and others of all those Complaints for which the Pills are so efficacious.

Dr W. Evans' Office where both his Camomile and Aperient Family Pills can be obtained, is at 95 Division street, New York.

ADAMS'S PATENT

THE subscriber has on hand a good assortment of the Swelled Beam Windlass Bedsteads, which, for comfort and convenience is undoubtedly the best article yet invented; its chief peculiarity is that of the Swelled Beam, the effect of which is to produce a crowning, and elastic sacking, and effectually provides against its saging. They are easily set up or taken down, and may be saved in case of fire as easily as any other piece of furniture, and from its mode of construction less liable to harbor insects than any other kind; but above all its advantages is the ease and comfort obtained from the sacking, by means of its being made and kept elastic by means of the Swelled Beam, (the form of which is exhibited in the above cut.)

Orders thankfully received, and promptly attended to

CHARLES ADAMS, Patentee,

422 Washington st. a few doors south of Washington Bank.

C. A. has added a steam power to his manufactory which will enable him to give a full supply at a cheaper rate than hertofore.
